Pile: Acrylic, Acrylic + Polyester, Acrylic + Wool

SPECIAL FINISHES

CHEVIOT

Composition:
Pile: Acrylic + Wool

FINISHES

Thanks to the brushing process, the reverse side acquires a velvety, soft-touch finish, making it ideal for direct contact with the skin.

We achieve a range of sherpa finishes across diverse textile compositions, made possible by our specialized industrial machinery.

The application of resin to the reverse side enhances the fabric's stability and durability, creating a protective barrier, reinforcing its structural integrity, and improving handling during assembly and manufacturing processes.
